18. (Unclassified - PLC) LEGISLATION Jim Oliver, OMB, called on behalf of their legislative section. He asked if the Agency would have any objections if the legislative people disclosed the actual number of Agency retirees under CIARDS when they present the Administration's bill to abolish the 1% kicker in the cost-of-living allowance to the Congress. I told him I would get back to him on this matter.

4. (Unclassified - WPB) LEGISLATION Called Ed Strait, OMB, who is coordinating the President's veto package on S. 1517, the Foreign Relations Authorization Act. He was not in, so George Gilbert returned my call. Gilbert asked why we had an interest in S. 1517. I said that Ray Chapman, of ERDA, had called me and suggested that we weigh in on the veto question. Gilbert said that he had not sent us the enrolled bill because it had not occurred to him that there was a problem for CIA in section 146. I discussed with him the same points raised with Les Janka, on the NSC staff, earlier in the day. He agreed that there was little question but that the bill applied solely to military weapons and weapons technology. He said, however, that it was conceivable that the impact statement under section (b)(2) be required to include finished intelligence. He said the main problem with the provision, however, was that it would "ball up" the whole military authorizations and appropriations process. I said that we might be sending in a letter to OMB stating our views on section 146.

	2. (Unclassified - WPB) LEGISLATION In response to a call from Ray Chapman, ERDA, called Les Janka, on the National Security Council staff, concerning section 146 of S. 1517, the Foreign Relations Authorization Act. Janka said that OMB was putting together a veto package for the President and that if we had a problem with the section we should send our comments to OMB as soon as possible. I asked him what he thought the main problem with section 146 was. He said that there was concern over the role which ACDA would be given under the provision and also some uneasines about the ambiguity in the kind of impact statements required to be submitted to Congress under paragraph (b)(2). He said that ERDA has raised the point that Congress might expect finished foreign intelligence to be included in these reports. I asked Janka whether he thought there was a potential proble with the word "technology" in subsection (a) of the provision as it might apply to intelligence technology. He said he thought that was "farfetched" and that it is clear from the bill and from the legislative history that military arms technology is meant.	s m
TAT	3. (Unclassified - DFM) LEGISLATION In response to his call to and after checking with in the Office of Financs I called Jim Oliver, OMB, and provided him figures on cost savings for the CIARDS fund if the one percent legislation is adopted.	TAT
